

JOHN AUGUSTINE L. LAPINIG

COMPUTER ENGINEER

Ubca 3, Quiot Cebu City | john6lapinig@gmail.com | lapinig-portfolio.vercel.app | 09499470809

SUMMARY

Computer Engineering graduate with hands-on experience in front-end web development, UI/UX design, embedded systems, and scalable software solutions.

EDUCATION

Bachelor of Science in Computer Engineering 2022 - 2026
Cebu Institute of Technology - University

- Completed coursework in digital systems, embedded computing, software engineering, data structures, and computer architecture.

PROFESSIONAL EXPERIENCE

Internship / OJT at Arielus Software Inc. June 2025 - July 2025
Served as a QA Tester intern for a one-month training, gaining hands-on experience in manual and automated testing using Azure DevOps, Selenium, Test & Feedback, and Google Lighthouse.

PROJECTS

Para.Go (Capstone / Thesis Project) 2025 - 2026

- Cebu Smart Jeepney Automation and Monitoring System – Collaborated on an automated system with GPS tracking, RFID passenger counting, cashless fares, and ambient fan/lighting control, featuring a mobile app for real-time monitoring to enhance commuter safety and efficiency in Cebu City. Presented the project to Cebu City Mayor Nestor D. Archival Sr. and city government officials at Cebu City Hall on March 11, 2026.

Technologies Used: HTML/CSS, TypeScript, React Native, Firebase, AWS Lambda, Expo, Xendit 2025

WildWisdom (Software Development 3 - Alliance Software Inc.)

- Built a library management web application with book cataloging, borrowing, OTP authentication, and admin reporting during the ASI Bridge/JumpStart Program, a training partnership between Alliance Software Inc. and CIT-U.

Technologies Used: HTML/CSS, C#, JavaScript, ASP.NET, SQL

WILDFind (Software Development 2) 2025

- A Lost-and-found web application for reporting, searching, matching, and managing item claims.

Technologies Used: HTML/CSS, JavaScript, React, Firebase

Opticare (Software Development 1) 2024

- Optometric patient management system with patient records, appointments, prescriptions, diagnoses, and clinic search.

Technologies Used: HTML/CSS, JavaScript, React, Firebase

SKILLS

Programming Languages: C, C#, HTML, CSS, JavaScript, TypeScript, C++
Tools/Frameworks: VS Code, GitHub, Sourcetree, React.js, Node.js, Tailwind CSS, Vite, Figma, Tinkercad, PlatformIO, AWS (IoT Core, Lambda), Expo
Databases: MS Access, Firebase
Soft Skills: Problem Solving, Time Management, Teamwork, Communication
Hardware/Embedded Skills: Soldering, Circuit Assembly, Prototyping, Ethernet Cable Termination, Arduino, ESP32

ADDITIONAL INFORMATION

- Languages:** Bisaya (Fluent), Tagalog (Basic), English (Basic)
- Certifications:** Certificate of Completion (OJT), Alliance JumpStart Training Program – Certificate of Completion
- Awards/Activities:** Alliance JumpStart Training Program (December 2025) Recognized as an outstanding performer and awarded a Certificate of Merit in an industry-partnered software development program.
